COMICCRAFT AI

Phase 1 - Brainstorming and Ideation

The main idea of ComicCraft AI is to create a simple web application that helps users create comic stories with AI assistance.

Key Objectives

- Identify the problem of creating comic content manually.
- Plan an easy-to-use comic creation system.
- Decide the main features such as story generation and comic image display.
- Choose Python and FastAPI for the application.
- Define the expected final output as a simple digital comic.

Expected Outcome

The project idea and basic features were finalized.
