COMICCRAFT AI

Phase 4 - Project Planning

Project planning defines the development steps, required tools, and expected milestones.

Key Objectives

- Set up the Python development environment.
- Create the ComicCraft project folder.
- Install the required Python packages.
- Create the backend and frontend files.
- Develop the story generation feature.
- Add comic image display and PDF export.
- Test each feature before final demonstration.

Expected Outcome

A step-by-step development plan was prepared for completing the project.
