COMICCRAFT AI

Phase 5 - Project Development

In the development phase, the planned ComicCraft AI features are implemented.

Key Objectives

- Create the FastAPI backend using Python.
- Create the HTML page for the comic interface.
- Add CSS for a simple and attractive design.
- Add the story input and generation functionality.
- Display the generated story on the web page.
- Add a comic image to the output.
- Implement the PDF export or download functionality.

Expected Outcome

A working ComicCraft AI prototype was developed with story and image display.
